The Gladiolus Beautiful

"The Crowning Splendor of the Floral World"

WHITE WONDER

There is a fascination in growing these flowers of unrivaled loveliness.

The sword-like foliage; the tall, upright stems clothed with flowers of exquisite beauty; the great variety of magnificent colors; the ease of culture; the sureness of bloom; and the lasting quality when cut—all combine to make the Gladiolus one of our most popular flowers.

THE GLADIOLUS

Gladiolus! Wond'rous color sprays,
Gorgeous as the clouds in sunset's rays;
Endowed with charming form and dainty grace,
Spires of beauty towering into space;
Floreate clusters; guarding swords of green—
Crown you Nature's wonder and proclaim you
Queen.

—Stanley Thorpe.

Greetings

To my Customers:—

In presenting you with this new catalog for 1923, I wish to thank you heartily for the flood of orders with which you favored me during the past season. In March and April you had me just about "snowed under" with those welcome pink order blanks. You may rest assured that I will do my level best to merit your continued patronage.

I wish also to express my sincere appreciation of the many very encouraging reports you have sent me on the success and pleasure you have had in growing Gladioli from my bulbs. I am interested in your success; let me share it with you during 1923.

You will be interested to learn that my business last season nearly doubled that of the previous year. This approves my policy of so treating my customers that they not only come back the next spring, but bring their friends with them.

You will also be pleased to find that prices have been reduced on many kinds, owing to increase of stock.

The Gladiolus is increasing in popularity by leaps and bounds, and interest is constantly being stimulated by the introduction of new and improved kinds of great beauty. Notice the choice new varieties offered for the first time this season.

Thanks to abundant moisture and sunshine my bulb storage is full of vigorous bulbs ready to bloom for you. Let these wondrously beautiful flowers gladden your garden this coming summer!

Sincerely yours,

HOWARD M. GILLET.

THE MODERN GLADIOLUS

A wonderful improvement has been made in the Gladiolus during the last few years. Those who are acquainted only with the old red spikes which grew in Grandmother's garden will hardly recognize it as they gaze on the large and gorgeous flowers of the modern hybrids which are the result of thousands of crosses made by specialists in this line. The newer kinds embrace many varieties producing from 12 to 20 blooms on a single spike, many of which will measure from four to six inches across. Nearly all the colors of the rainbow may now be found. The combinations of colors and beautiful markings of the petals and throat cannot be surpassed by any other flower. As sturdy as the lily and as exquisite as the expensive orchid it may be grown successfully by the amateur in any ordinary garden, and if several plantings are made in the spring at different times, bloom may be had from the end of July until frost. Covering the widest range of color from the brightest blood-red scarlet, deep purple and rich carmine shades to the most delicate tints of white, pink, yellow and lavender, they prove at once the most showy and attractive of garden flowers. They are rightly called "The People's Orchid." With freedom from disease and insect pests there is no easier flower to grow. No other flower gives so much satisfaction at small expense. If you have never planted any of the newer varieties such as are offered you in this booklet, give them a trial. They will be a delight to the eye and a joy to the soul.

On account of its good keeping qualities the Gladiolus surpasses all other flowers for cutting purposes, and in order to obtain the utmost pleasure from the blooms you should place them in vases in the house. The Gladiolus is particularly adapted to table decoration. Cut the spike in the morning or evening when the first bud opens, leaving three or four leaves on the plant to mature the bulb. Change the water daily, remove the withered portions, and cut (on a slant) an inch or so from the end of each stem. Every bud will open one by one to the very top, and a vase of blooms may be kept fresh and beautiful for a week or ten days.

CULTURE

The culture of the Gladiolus is so simple as to render it the most satisfactory of garden flowers, thriving and blooming freely with the least care and attention and making a display which for beauty of bloom and brilliancy of coloring is unequalled by any other flower. If you can grow potatoes you can grow Gladioli. Plant in any good garden soil as soon as ground is workable up to the middle of June. If several plantings are made at different times the season of bloom will be lengthened. Do *not* plant in shade of trees or buildings, and do not allow *fresh* manure to come in direct contact with bulbs. Use well-rotted manure, commercial fertilizer, wood ashes, or bone meal, well mixed with the soil. Set the bulbs five to six inches deep in rows and about three to four inches between each bulb. Rows about 18 inches apart. Or may

be massed in beds about four inches apart each way. If planted in quantity and to be cultivated with a horse make rows 30 to 36 inches apart. Keep soil loose and free from weeds. When cutting flower spike let three to four leaves remain on the plant to allow the bulb to mature properly. Dig bulbs in the fall, cut off tops, and after drying in the open air for a few days store away in a dry, cool but frost proof place in the cellar.

WHAT THEY SAY

Some Extracts From Recent Letters.

I am well satisfied with the glads which I received from you last Spring. In fact they gave us a lot better satisfaction than those received from two other growers at much higher prices. Please send your 1923 catalog, when ready.

R. E. WHITLAM, Ohio.

Last year being my first year to purchase bulbs of you, I wish now to thank you for the good bulbs which you sent. The A, B, C, and D Collections which I purchased from you were exhibited at local fairs and awarded 1st premiums on named varieties.

HOWARD T. WHITE, Conn.

Just a line to tell you how pleased I was with the nice large Gladiolus bulbs you sent me last spring. They were the most beautiful ones I have ever seen. Strangers passing by would stop in autos to see them, and wanted to buy. I gave them your address and spoke a good word for you.

MRS. A. A. GOODRICH, N. H.

My bulbs came fine. They were the nicest collection of bulbs I ever saw. Thank you for the pains you took with them, also for paying postage.

MRS. J. B. VANDERWERKER, N. Y.

The bulbs I received from you last spring did wonderfully well as it was my first attempt with Gladiolus. Everyone who saw them remarked at the richness of their coloring and of course wanted to know where I got them. I am sending you a few names of friends of mine that grow bulbs, and wish you would send them your catalog.

A. E. BRAMMER, Canada.

Am very much pleased with the Evelyn Kirtland. It is better than the Pink Perfection which has been my favorite pink. In fact it is the best pink variety I have ever seen. I wish also to say that the Europa is the finest white that I have ever grown. It is not only the whitest, but the longest lasting.

E. R. JOHNSON, Pa.

I wish to thank you for the fine Gladiolus bulbs you sent me some time ago. I have a number of bulbs from _____, including some of his finest, but when it comes to size your's are among the finest. It is a credit to you.

CHAS. G. REINHARDT, N. Y.

I have a word of praise for your Gladioli. They are the grandest I ever had. They were very much admired by all my friends; several of my neighbors have been given your address by me; they wish to have glads like mine. You may use these words in your testimonials if you wish.

MRS. M. W. DAVIS, N. Y.

My order of Gladiolus bulbs came to hand a few days ago, in good order, and am pleased with same. Will say they are about the nicest, plumpest, and freshest lot I have ever received.

MRS. E. P. HARDESTY, Ky.

Your bulbs reached me this morning, and they are fine. I have received no better this season. I hope to be able to send you a larger order next season.

MRS. E. M. GAYLORD, Calif.

The bulbs ordered from you were in a separate bed from others and as a recommend for them I want to say that a lady who is borrowing my catalog asked where I got my bulbs last year—they were so very much better with same cultivation and treatment than others I had, and very beautiful besides.

MRS. H. E. AMEY, Pa.
